Career Objective

A motivated learner interested in software development, gaining knowledge through practical projects and peers. Always seeking for opportunities to enhance technical skills and contribute positively to a team and learning from real world problems.

Education

- **B.Tech, Artificial Intelligence and Machine Learning**
Shri Ramdeobaba College of Engineering and Management (2023-present)
CGPA: 8.36
- **Class 12 HSC**
The Jain International School, Nagpur (2023)
86%
- **Class 10 SSC**
The Jain International School (2021)
99.6%

Technical Skills

- **Languages:** Java, Python, C, C++, SQL
- **Frontend:** React.js, Tailwind CSS
- **Database:** Postgre SQL
- **Cloud & DevOps:** AWS, Docker, Kuber

Projects

- **Credit Card Approval System**
 - Built an end-to-end machine learning project involving data analysis, feature preprocessing, and training of multiple classification models for credit approval prediction.
 - Conducted EDA to understand data patterns and improve model performance.
 - Deployed the application using Streamlit, enabling users to input details and view approval predictions.
- **Leprosy Detection System**
 - Developed a Healthcare AI solution for early-stage leprosy detection, utilizing Deep Learning and the Xception architecture for high-accuracy image classification.
 - Engineered robust Computer Vision pipelines using OpenCV and Data Augmentation to process skin lesion datasets and prevent model overfitting.
 - Built an interactive web interface using Streamlit, allowing users to upload images and receive real-time disease predictions.
 - Evaluated model performance with Matplotlib and Seaborn, visualizing confusion matrices and accuracy trends to ensure reliable clinical deployment.
