Career Objective

A motivated learner passionate about software development, with hands-on experience building practical projects across full-stack and AI domains. Eager to contribute to collaborative teams, tackle real-world engineering challenges, and continuously grow technical depth.

Education

B.Tech — Artificial Intelligence & Machine Learning	<i>2023 – Present</i>
Shri Ramdeobaba College of Engineering and Management	CGPA: 8.36
Class 12 HSC — The Jain International School, Nagpur	<i>2023</i>
	86%
Class 10 SSC — The Jain International School	<i>2021</i>
	99.6%

Technical Skills

Languages: Java, Python, SQL

Frontend: React.js, Tailwind CSS

Databases: MySQL, PostgreSQL

Cloud & DevOps: AWS, Docker, Linux

Core Subjects: Database Management Systems, Operating Systems, Data Structures & Algorithms

Machine Learning: Deep Learning, Natural Language Processing

Projects

- Leprosy Detection System** 📁 GitHub *Aug 2025 – Oct 2025*
React.js, Flask, TensorFlow, OpenCV, CNN
- Built a deep learning web app for early-stage leprosy detection using CNN-based classification on 4,850 dermoscopic images.
 - Benchmarked ResNet-50, DenseNet-121, and EfficientNet-B0; ResNet-50 achieved 88.06% accuracy and 91% precision on positive cases.
 - Developed Flask REST APIs for OpenCV preprocessing and model inference; built a React.js dashboard with Grad-CAM heatmap visualization.
- AI-Augmented Hospital Management System** 📁 GitHub *Feb 2026 – May 2026*
Node.js, TypeScript, React, Next.js, PostgreSQL, Prisma ORM, RabbitMQ, Redis, Docker
- Architected a scalable event-driven healthcare platform using microservices, ensuring high availability and eliminating single points of failure.
 - Implemented a Database-per-Service pattern with PostgreSQL and Prisma ORM, achieving 99.9% fault isolation during partial service outages.
 - Reduced synchronous API load by 40% using RabbitMQ for async workflows — automating billing, notifications, and background processing.
 - Integrated LLM-powered medical report summarization and a Redis + WebSocket real-time queue system for live operational visibility.

Certifications

- MumbaiHacks 2025
- GDG RBU — Bappa Ka Prashad 5.0
